If he wins the presidential election in October, it can go down as the political comeback of the decade — if not the century. Luiz Inácio Lula da Silva, a former shoeshine boy and metalworker, benefited from an financial growth as Brazil's president and left workplace in 2010 with an approval ranking above 80 per cent.

"I was aware that if I reached the presidency of Brazil and my government didn't work out, a worker would never again be able to think about becoming president," he says in an interview with the Financial Times at his marketing campaign's media hub, a hip workplace area in a trendy neighbourhood of São Paulo.

Under his anointed successor, Dilma Rousseff, nonetheless, the financial system plunged right into a brutal two-year recession — partly consequently of insurance policies launched in his second time period. It has struggled to generate sturdy, sustained development ever since.

The leftwing Workers' occasion (PT) he has dominated for 4 many years was revealed to have been at the centre of a large graft scheme whereas Lula and Rousseff have been in workplace. The US Department of Justice described it as the "largest foreign bribery case in history".

As the nation turned enraged at the extent of the corruption below PT rule, Lula was jailed in 2018 on graft costs — spending 580 days in a federal jail. While he was in jail, Jair Bolsonaro, an anti-establishment far-right former military captain, gained the presidency.

Yet after being launched in 2019 on a procedural difficulty, Lula is now on the verge of a surprising second probability. According to the opinion polls, the 76-year-old, who stays an icon of the Latin American left, is a powerful favorite to win again the presidency in October from Bolsonaro.

With many Brazilians seemingly exhausted by Bolsonaro's mismanagement of the Covid-19 pandemic and infinite tradition struggle antics, Lula — wearing a sensible navy blue swimsuit and red-striped tie — is making an attempt to influence individuals that he's a statesman who can carry political stability and haul the nation out of the financial gap it has been in for a lot of the previous decade.

I'm very unhappy as a result of 12 years after I left the presidency, I discover Brazil poorer

"I am very sad because 12 years after I left the presidency, I find Brazil poorer," he says. "I find more unemployment, more people going hungry and Brazil with a government that has very low credibility at home and abroad."

Lula greets his interviewers like outdated associates and the dialog consists of an animated discourse about the relative deserves of Brazilian and British soccer, ending together with his conclusion that the sport has been the greatest winner from globalisation.

Although there are nonetheless three months to go earlier than the first spherical of voting on October 2, Lula is main in some polls by a margin of 10 share factors or extra. "It's Lula's election to lose," says Oliver Stuenkel, a political knowledgeable at the Getúlio Vargas Foundation in São Paulo. "It's incredibly difficult for Bolsonaro to be a competitive candidate."

With their sturdy bases of loyal supporters, Lula and Bolsonaro dominate the political panorama, leaving little area for challengers. But each are additionally divisive figures who generate so much of resentment.

Indeed, they've fed off one another. Lula's insistence that the corruption scandal was largely a conspiracy towards his occasion generated a deep effect of cynicism amongst many citizens, opening the method for a political outsider. Bolsonaro gained in 2018 by presenting himself as the anti-Lula candidate.

Now Lula is positioning himself as the antithesis of Bolsonaro, a politician recognized for tirades towards ladies, gays and environmentalists. After practically 4 years of the present president, who champions conservative values and gun possession, Lula says Bolsonaro "has become a pariah of humanity".

His capability to attach with individuals stands in distinction to Bolsonaro, who, in accordance with pollsters, alienated voters via his reckless perspective to Covid and his lack of empathy for the 674,000 Brazilians who misplaced their lives.

For the enterprise neighborhood, the query is: if he does win, which model of himself will Lula govern as — the financial pragmatist of his first

years or the extra ideological interventionist who emerged throughout his second time period?

Lula provides away few specifics about his plans: nonetheless onerous you attempt to level his gaze in the direction of the future, he prefers to recall previous triumphs and his dealings with former leaders resembling Tony Blair, Jacques Chirac and Gerhard Schroeder.

But he desires to be seen as a secure pair of palms. Lula stresses “three magic words in governing”: credibility, predictability and stability. At his age, he provides, he’s “more experienced, more seasoned and with a much greater desire to get it right”.

Looming recession

Lula’s first election to the presidency in 2002 was marked by a chunk of nice political fortune: it coincided with an extended rally in world commodity markets that was sparked by speedy development in China. Along with a number of different resource-rich international locations in the area, Brazil’s financial system soared.

If he wins once more this October, nonetheless, Lula might be confronted with a really totally different setting: a possible world recession and a stretched finances that leaves little room for discretionary spending.

Brazil is ready to develop between 1 and a couple of per cent this 12 months and unemployment has fallen beneath double digits for the first time since 2016, however inflation is a giant fear. Prices are rising 12 per cent a 12 months, although the central financial institution has pushed up rates of interest to greater than 13 per cent. A beneficiant fiscal stimulus throughout the pandemic lowered deprivation however was withdrawn quickly after.

Extreme poverty jumped by greater than a 3rd final 12 months to 14 per cent, in accordance with FGV Social. The analysis centre stated 36 per cent of the inhabitants didn’t find the money for meals, based mostly on a Gallup ballot, in a rustic that’s one of the world’s greatest agricultural exporters.

Ahead of the poll, Bolsonaro is betting on larger handouts to the poorest and is hoping to push via gasoline subsidies for truckers and taxi drivers.

Lula prefers hovering rhetoric over coverage element. He turns into emotional when he speaks about his personal deprivation as a baby. “I didn’t eat bread until I was seven,” he remembers. “I often saw my mother standing by the stove with nothing to make for lunch or dinner.”

He says he’ll get rid of a constitutional cap on public expenditure and insists that social spending is an funding, not a price. “When poor people stop being very poor and become consumers of health, education and goods, the whole economy grows,” he says.

Yet he additionally dismisses doubts about his dedication to fiscal accountability. “I learnt very young from my illiterate mother that I couldn’t spend more than I earned.” He factors to his selection of vice-president, Geraldo Ackmin, a centrist chief who as soon as ran towards him, as proof of moderation.

Lula says he’ll title a finance minister who isn’t an economist however a talented politician suggested by a gaggle of specialists, as he did in his first time period. He desires to overview labour reforms enacted after the PT left workplace and says he’ll overhaul the tax regime — a transfer the Bolsonaro authorities tried however failed — to make the wealthy pay extra.

Thomas Traumann, a political commentator who labored in the Rousseff administration, believes Brazil can count on a combination of Lula’s pragmatic first time period and the larger state interventionism of his second time period. But he dismisses fears of radicalism.

“The main difference from Lula today and the Lula who was president is now he centralises decisions much more than before,” says Traumann. “He trusts less people. You can count them on one hand.”

Lula has little sympathy with enterprise individuals who fear about attainable extremism and criticise him for an absence of new concepts. “The Brazilian elite has a slave-owning mentality,” he says, referring to the criticism he acquired when his occasion formalised the employment of home staff. “You know what they said here in Brazil when the traffic was bad? That it’s a disgrace that Lula allowed poor people to buy cars.”

Despite his hostile rhetoric, Brazil’s financial elite isn’t panicking at the concept of Lula’s return to energy. The fixed political turbulence of the Bolsonaro administration has unnerved the enterprise neighborhood regardless of the implementation of some financial reforms, resembling limits on public sector pensions and a few privatisations. And Lula is a recognized amount. “Lula is not an institutional threat,” says one senior banker. “We’ll lose some quality in economic policy but it won’t be a reversal.”

Alberto Ramos, chief Latin America economist at Goldman Sachs, is extra involved. “The public sector in Brazil is astonishingly inefficient and Lula wants to empower it — and that’s not a good thing,” he says.

‘The poor were seen’

Lula’s best power as a candidate is the reminiscence of the rising prosperity throughout his time in workplace.

Half an hour away from his marketing campaign workplace, alongside a avenue of tall, makeshift buildings painted in shiny colors, native activists have used the pandemic as an alternative to launch a social enterprise hub that gives every part from vegetable rising courses in an allotment for girls dealing with home violence to microcredit. In this favela, or shanty city, named Paraisópolis, some 100,000 individuals stay on the margins of São Paulo. Many recall Lula’s time in workplace fondly. “The poor were seen,” says Gilson Rodrigues, a neighborhood chief.

Like others, he says issues worsened throughout the pandemic in a neighbourhood the place ambulance drivers concern to enter. No one has forgotten the corruption throughout the PT years. But Lula is seen as a frontrunner who transcends his occasion and isn’t motivated by private acquire. “Lula stole but gave to the poor, Bolsonaro stole but gave to the rich,” quips a younger supply driver, reflecting a preferred notion.

During the Lula years, Brazil sharply lowered poverty via social welfare programmes resembling Bolsa Família — a money switch programme for the poorest.

Under Rouseff, nonetheless, the attain of the Brazilian state into the financial system expanded additional as interventionist insurance policies took maintain. Her authorities's meddling and years of free fiscal coverage have been blamed for hovering inflation and Brazil's worst recession on document.

The PT was additionally at the centre of Latin America's greatest corruption scandal, often called Lava Jato (Car Wash), centred on kickbacks for contracts with state-controlled oil group Petrobras. With her recognition in the doldrums, Dilma was impeached in 2016.

By the finish of the Car Wash investigation, a number of hundred businessmen and politicians had been convicted. Lula himself was discovered responsible of receiving bribes in the kind of favours associated to a beachside residence and a rustic home. He was sentenced to 12 years in jail, eliminating him from an anticipated run in the 2018 presidential race.

Released from jail pending a brand new enchantment, his conviction was overturned by the supreme courtroom in April 2021 on a jurisdictional technicality. Lula has all the time insisted that the investigation was politically motivated. The incontrovertible fact that the decide who initially convicted Lula, Sergio Moro, then went on to function Bolsonaro's justice minister added weight to that view.

"If there was corruption, it was investigated and people paid a price for having paid a mistake," Lula says. "What happened in Brazil was a political action to try to destroy the image of many people and prevent me from becoming president in 2018."

Bearing arms

Inside the cramped Brasília workplace of Eduardo Bolsonaro, third son of the president and a congressman for São Paulo state, are the trappings of his household's rightwing world view: miniature figures of Donald Trump, the former US president, a reproduction revolver and a framed copy of the second modification of the American structure guaranteeing the proper to bear arms. A tall, neatly dressed former federal policeman, the younger Bolsonaro rails towards the supreme courtroom and mainstream media, who he says are clamouring for the return of Lula.

He insists the polls are incorrect and that the race is tied. His father, he says, is a "freedom fighter" who was one of the few world leaders to face towards Covid restrictions, whereas Lula is a dictator in the making.

Will his father concede if Lula prevails? Bolsonaro has stated that solely God may take away him from energy. Eduardo repeats the president's declare that the long-established digital voting system should be modified earlier than the election however won't remark on the penalties if it's not. Lula himself dismisses strategies of a post-election disaster just like the US Capitol riot or navy intervention. "Bolsonaro is someone who bluffs," says Lula. The president might desire a coup however "he would be on his own".

Brazil's allies might be watching intently. Lula guarantees to carry the nation again to the world stage as an environmentally accountable and socially conscious main growing energy. He says he'll introduce a brand new border drive and sharply scale back deforestation, citing his success in the first time period as proof of his capability to ship. "We have to make the preservation of the Amazon a top priority."

We must make the preservation of the Amazon a prime precedence

His views on geopolitics might be much less welcome, with the west now enmeshed in a brand new chilly struggle with Russia and China. Lula has beforehand criticised Ukraine's President Volodymyr Zelenskyy as partly liable for the Russian invasion. But he insists that Brazil won't be drawn into taking sides in the Ukraine struggle, and that negotiations should be tried. He criticises the US for its "lack of patience" in in search of peace and sees himself as a possible negotiator who can communicate to all sides, together with China, Brazil's greatest buying and selling companion, and the US, its ally and largest international investor.

A victory this October would hand him the alternative to outline his legacy for posterity. He has stated he won't run for a fourth time period.

Veteran pollster Carlos Augusto Montenegro says that to safe his place in historical past, Lula ought to appoint a broad cupboard of specialists and try actual reforms to Brazil's dysfunctional political system.

Lula insists that his speedy precedence might be bettering social circumstances. Can he slay Brazil's twin demons of starvation and poverty? Lula solutions with a gruff chuckle: "If I manage that, my dear friend, I will go to heaven."
