Pressbee - Daily Sun :

Watch the post from , Now to the details :

SAO PAULO: The risk of going hungry in Brazil is higher than ever, as the percentage of people unable to afford food for themselves or their family at some point during the last 12 months rose to a record 36% in 2021, from 30% in 2019, a newly published study showed. It is the first time that food insecurity in Latin America's largest food producer has surpassed the world average since the data tracking began in 2006, according to a new analysis of Gallup World Poll data released on Wednesday by the Getulio Vargas Foundation (FGV), a Brazilian academic institution. Brazilians are facing this dire situation even though the country is one of the world's top agricultural goods producers. Food pri
