SAO PAULO, May 26 (Reuters) – The threat of going hungry in Brazil is greater than ever, as the proportion of individuals unable to afford food for themselves or their household in some unspecified time in the future over the past 12 months rose to a record 36% in 2021, from 30% in 2019, a newly revealed examine confirmed.

It is the primary time that food insecurity in Latin America's largest food producer has surpassed the world common because the information monitoring started in 2006, in keeping with a brand new evaluation of Gallup World Poll information launched on Wednesday by the Getulio Vargas Foundation (FGV), a Brazilian tutorial establishment.

Brazilians are dealing with this dire scenario though the nation is one of the world's high agricultural items producers. Food costs have risen sharply following Russia's invasion of Ukraine, mentioned economist Marcelo Neri, director of FGV's Social Policies Center and the examine's writer.

"It is a worrying situation, the highest level of the series," Neri advised Reuters.

The enhance in food insecurity among the many poorest 20% in Brazil through the pandemic rose to 75% in 2021, from 53% in 2019, nearing ranges in Zimbabwe, which has the very best degree of food insecurity on the planet at 80%, the info confirmed.

The examine additionally mentioned that the gender hole in food insecurity in 2021 was six occasions better in Brazil than the worldwide common.
