7.1 Distribution of Income around the World:  
Graphic Approach - Levels and Changes

Marcelo Neri  
FGV Social

*** Introduction (Big Picture of the book)  
**Chapter 1: **Global Data (Excursus 1.1); Top 1% (later)

**6.1 Video Milanovic at Peterson Institute from 3:20 to 26:25 minutes  
***6.2 Video Milanovic and Piketty at Paris School of Economics  
- first 20 minutes

Obs:  
* means obligatory reference (i.e. the less “*” the more relevant)  
That is * has priority over ** and so forth

GLOBAL INCOME DISTRIBUTION PORTRAIT – WHERE ARE BRAZIL, RELATIVE TO THE BRICs, THE US & THE WORLD

Source: Milanovic (2011) data circa 2005  
www.fgv.br/fgvsocial
Definition: The Growth Incidence Curve (GIC) refers to the growth rate of income for every quantile (percentile, vintile, decile etc) of the income distribution between two points in time. Change in real income between 1988 and 2008 at various percentiles of global income distribution (2005 international dollars)

![Graph showing real income change at various percentiles of global income distribution between 1988 and 2008](image)

Real income change at various percentiles of global income distribution between 1988 and 2008 (in percent) – According to this graph there is an improvement to every part of the distribution - Pareto Improvement

![Graph showing real income change at various percentiles of global income distribution between 1988 and 2008](image)
